Say Goodbye to Manual Attendance – Meet NoQu

- With NoQu, employees can check in and out with a single click or even use face recognition for a secure, touchless experience.
- NoQu adapts to your needs with smart features like shift scheduling, automated reports, and seamless integration with payroll systems.
- NoQu is more than just attendance software. It's the future of employee management—right at your fingertips.

What Is Attendance Software

- Attendance software is a digital tool designed to track and manage employee attendance in an accurate, efficient, and automated way. It replaces traditional methods like paper registers or manual spreadsheets, helping businesses streamline workforce management and reduce human error.
- With attendance software, employees can check in and out using various methods such as web portals, mobile apps, biometric devices, or even face recognition systems. The software records real-time data, including working hours, overtime, breaks, absences, and more—all stored securely in a centralized system.
- For HR teams and managers, attendance software offers powerful features like shift scheduling, leave management, automated reporting, and integration with payroll systems. These tools not only save time but also provide valuable insights to improve productivity and ensure compliance with labor laws.
- Whether you're managing a small team or a large organization, attendance software is essential for maintaining accurate records, boosting accountability, and simplifying your daily operations. In today’s hybrid and remote work environments, it’s more important than ever to have a reliable solution to monitor attendance—anytime, anywhere.

Online Attendance System

HR Payroll Software

HR payroll software is a powerful tool designed to streamline and automate the management of employee compensation, tax calculations, attendance tracking, and benefits administration.

Face Recognition

Face recognition is a biometric technology that identifies or verifies individuals by analyzing their facial features from images or video frames..

QR Scan

Simplify attendance with quick QR code scanning for users.

Live Location Tracker

Track employee locations in real time to enhance operational efficiency.
